A proxy for Indian Urban Consumption

# Strong Macro Tailwinds Bode Well for Retail Sector

India Consumption Growth rate

Transition from unorganized to organized retail

Indian retail industry will register strong growth

Fig in US\$ bn

## Consumption to grow substantially in future

- ✓ India consumption in real terms grew at average of 6.9% in the last five years
- ✓ Organized retail is expected to grow much faster than unorganized retail, increasing the overall contribution of organized retail to 24%

## Increase in per capita disposable income in India

Fig in US\$

## ... growing urban population

## ... and high proportion of young population

Age Group

## Consumption set to grow substantially in future

- ✓ Nearly 35% of the Indians are currently living in urban areas – this figure is expected to increase in the coming years.
- ✓ Young population (c79% below 44 years) coupled with increasing urbanization is leading to a rapid rise in the number of nuclear families.
- ✓ Over 70% of consumption growth in the next 15 years is expected to come from working population aged 15-59 years and increased per capita consumption

# Retail malls in India: Widening gap of demand and supply

Mall additions in past three years at all-time lows...

... while demand for new rental space will remain robust

- ✓ There is dearth of quality mall space in India
- ✓ Gap between demand and supply is further expected to widen as the demand will outstrip supply by wide margin
- ✓ PML is well positioned to benefit from this favourable demand supply gap
- ✓ We are aiming to double our portfolio and have recently bought a new land parcel in West Pune, Bengaluru and an under-construction retail asset in Lucknow

# First Order Derivative of India's Consumption Story

- During FY13-18, consumption at our malls has grown at a CAGR of 20%
- The FY13-18 consumption growth is at c.2x of nominal GDP growth of India
- We expect consumption to continue growing at a rate superior to the nominal GDP growth

Retail Rental Income to grow in sync with underlying Consumption Growth

PML's consumption has grown at 2x of India's nominal GDP growth during FY13-18

# Long Term Sustainable Growth Delivered Through The Cycle

- ❖ In 2010, trading density and consumption at High Street Phoenix was at Rs 1,055 psf pm and Rs 4,371 mn, respectively → today, has grown over >3x since 2010
- ❖ All MarketCity malls are in similar position (in terms of trading density) as HSP was in 2010; poised to follow similar growth path as HSP over next few years

## MarketCity Malls Poised to follow HSP's growth path

## MarketCity malls to follow similar growth trajectory at HSP & Palladium

MarketCity Malls are attractively poised to exhibit similar long-term growth as HSP

# Revenue Cycle of a Mall

Cash flow from mall continues to grow even after mall matures

MAJORITY of retail lease agreements at PML pay HIGHER of Minimum Guarantee (MG) rents and Revenue Share (% of consumption)

Generally MG escalates by mid-double digits at the end of 3 years and mid-to-high single digits annually in the interim.

A typical 5-year lease agreement is renegotiated at much higher MG as well as higher Revenue Share % in year 6
